Project description:

Achieve the start-up of a First Aid Post in the communal premises of the Association of the Human Settlement Basilio Auqui with the support of the Red Cross; considering the new post-Covid sanitary regulations to carry out the remodeling and conditioning of the physical space assigned for its operation.

The purpose of the project is to provide an option in first aid to care for the population by not having a public post in the area (the closest one is 40 minutes away). This position will make it possible to meet the primary need for health prevention, performing basic check-up actions in a self-sustaining manner with payment at a social rate in alliance with the Red Cross of Peru; via voluntary cooperation of health professionals attached to the Red Cross and training residents for care in shifts. More than 5,000 families live in precarious conditions near a landfill. They already have a basic equipment for the position; For this reason, the project focuses mostly on the costs to meet and adapt to the requirements of the health and civil defense system, as well as the transfer of capacities for operation. Our Rotary Club will also support free health and nutrition campaigns with our Rotary and Rotaractor physicians. The area of interest is the project is Prevention and treatment of diseases.

Beneficiary Population (Name of the Community and indicate number of people)

Direct will be 1920 residents served by the Basilio Auqui Human Settlement per year of operation of the post. And indirectly the 5000 families of the community in its 08 sectors considered as a peri-urban area and a low socio-economic segment level D and E;

They recently had their water service installed, but they are waiting for the installation of electricity service.

Detailed budget:

Total Project Budget: \$ 10,610.00 (Referential exchange rate 3.88)

Quantity	Description	Unit Price	Amount \$
	a) Remodeling and conditioning physical space for a health center		5,556.19
