

# IMPLEMENTACIÓN DE LA CASA MATERNA RURAL- CHUQUIBAMBA

# NUESTRA VISIÓN

Due to the increase in maternal mortality in 2020 with 15 deaths and currently in the current year with 06 cases of maternal mortality and the early detection of risk factors, there is a need for the timely capture and completion of an institutional care of the delivery, as well as providing timely shelter to expectant mothers, this will help reduce maternal mortality.

# ESTRATEGIAS DE MEMBRESÍA

The Maternity House in a temporary inn, as well as it serves to provide an alternative service to pregnant women, where the pregnant mother who comes from remote places, as well as from Andean rural areas such as Yanaquihua, Ispacas, is cared for and prepared. , Salamanca and Andaray, are places that do not have the service for their due care, that is why it is very important to provide safety and well-being to the pregnant mother, thus preventing maternal and perinatal death.
