3. TOTAL FINANCING US \$ 6200

Rotary Club LOCAL contribution US \$ 500

Rotary Club SPONSOR Contribution US \$ 5700

4. PROJECT DESCRIPTION:

Due to the increase in maternal mortality in 2020 with 15 deaths and currently in the current year with 06 cases of maternal mortality and the early detection of risk factors, there is a need for the timely capture and completion of an institutional care of the delivery, as well as providing timely shelter to expectant mothers, this will help reduce maternal mortality.

The Maternity House in a temporary inn, as well as it serves to provide an alternative service to pregnant women, where the pregnant mother who comes from remote places, as well as from Andean rural areas such as Yanaquihua, Ispacas, is cared for and prepared. , Salamanca and Andaray, are places that do not have the service for their due care, that is why it is very important to provide safety and well-being to the pregnant mother, thus preventing maternal and perinatal death.

The Chuquibamba health center is committed to maintaining the mother's home.

A delivery and maintenance protocol has been established for the properties, materials and supplies to be delivered.

A training plan has been established for those in charge and for the execution of campaigns to raise awareness about the importance of maternal and child health, these activities have the participation and monitoring of the Rotary Club

The local Rotary Club would be involved in planning and executing awareness campaigns on the importance of maternal and child health:

- Campaigns on the importance of breastfeeding according to the context.
- Prophylaxis campaign for expectant mothers.
- Early stimulation campaigns.
- Rule out Anemia in children.

5. PROJECT BENEFICIARIES:

PLACE: Chuquibamba Community, Located in the district of Chuquibamba, Province of Condesuyos, Department of Arequipa.

With 51.7% (47,277) of women (INEI 2017)

The Maternity Home offers the opportunity of access to a health facility with the capacity to attend delivery to all pregnant women:

- Living in remote communities or those with little geographic accessibility.
- Who are at risk of giving birth without family or social support.
- Who are at risk of having a childbirth not attended by a health professional.
- Who have some obstetric complication or obstetric history of risk.

The Chuquibamba Health Center is prepared to offer adequate delivery care and, if necessary, for an effective referral to another health facility with a higher resolution with response capacity for obstetric and neonatal emergencies; since the risk situation or a complication can occur at any time during delivery and the immediate puerperium.
