#### PROJECT DESCRIPTION

The Visionary Program for Educational Institutions (VpIE) aims to promote quality education and equal opportunities that promote the strengthening of the capacities and social skills of youth, providing them with resources that allow them to identify and understand a problem of interest in their communities, promoting the active exercise of their citizenship.

To achieve this goal, our direct allies are the teachers who, after the family nucleus, occupy the second place of influence in the personal growth of each student. In this sense, the program focuses on comprehensive formative training and pedagogical accompaniment to teachers in the area of Personal Development, Citizenship and Civics of the third grade of public schools in the Cusco region - Peru. Through the implementation of didactic and participatory learning sessions, which allow the teacher to promote in their students the development of their critical thinking and soft skills.

In addition, in a transversal way, the VpIE Program works on the development of the transversal approach of Gender Equality, through the design of learning

sessions under a pedagogy with a gender perspective and the use of a visualizing language, thus seeking to contribute to a more social society. fair and equitable.

Faced with the provision of social isolation due to COVID-19, the response of the VpIE Program was to articulate its implementation with the national strategy Aprendo en Casa, adapting the strategies of the Visionary Curriculum to the sessions established by the Ministry of Education, under a distance modality . Adapted learning experiences, weekly collegiate workshops and permanent pedagogical accompaniment is the proposal of the new approach of the VpIE Program for distance education

The VpIE Program has the resources, the experience and the flexibility to be implemented remotely or in person, according to the disposition of the Ministry of Education. Having a subsidy will allow us to expand our scope of intervention, providing more training opportunities for secondary school teachers in rural communities in Peru, in order to:

1. Strengthen the skills and strategies of secondary school teachers and
2. Accompany teachers in the planning and implementation of the Visionaria curriculum to help achieve the objectives proposed by MINEDU / GEREDU / UGEL

## **BENEFICIARY COMMUNITY**

- **Located:**

Teaching population of the Department of Cusco

- **Number of persons:**
