Descripción del proyecto:

Achieve that blind people who normally use a traditional cane and have a guide or are supported by another person to move have greater independence with this tactile orientation device for the blind using ultrasound.

Población Beneficiaria (Nombre de la Comunidad e indicar número de personas)

Special Basic Education Center No. 09 "San Francisco de Asís" that serves students with visual disabilities, deafblindness and multidisciplinary. The Educational Center is located at 161 Marqués de Guadalcazar Street. Urb. La Virreina, Santiago de Surco. The students come from low-income families, so they have to transfer them from remote districts to the school campus. The number of direct beneficiaries will be 145 and indirect beneficiaries 725.
