PROJECT'S NAME: NEONATAL TRANSPORT

**Inka Project Fair
District 4455 - Perú
September 18-24th
2021**

PRESENTATION

A full-term newborn can regulate his body temperature naturally, **premature babies lose heat because their skin is thinner.** Thermal regulation is one of the critical factors in the survival and stability of newborns, so **an incubator for premature babies or neonates is a fundamental equipment of a neonatal intensive treatment unit.** In the Hospital of Santa Maria del Socorro in Ica the incubators are broken incubators and another have up to 19 years of operation

District 4455 - Peru
September 18-24th
2021**

AREA OF INTEREST:

-Maternal and Child Health

PROJECT OBJECTIVES:

To give better assisted transport of premature newborns to health facilities of greater complexity for their specialized treatment in order to reduce perinatal mortality rate in the department of Ica.

**Inka Project Fair
Distrito 4455 - Perú
September 18-24th
2021**

BENEFICIARIES:

The Hospital Santa Maria del Socorro of Ica attends 2,300 to 2,500 births a year; 3.5 to 5.00% of them are premature newborns, and 4 of every 1000 die during the first month of life.

The population benefited is from the department of Ica and the areas of extreme poverty of the departments of Ayacucho and Huancavelica.

2021

Activities planned to address the need and how the project will be sustained in the long term:

-With the grant money, we will buy a transport incubator, a blender and a compressor. The hospital health staff will be trained about the donated equipment and to the women in fertile age will be given educational talks about pregnant, pregnancy and prenatal care.

The project will be sustainable in time because it will depend absolutely on the Ministry of Health of the Province of Ica and the beneficiary institution will have custody of the equipment being responsible for the maintenance and repair of it. They should ensure its operation through the supply of the inputs necessary and appropriate professional equipment
