Description of the Project:

Green Tool is inspired by the necessity of bringing novelty solutions to the environmental imbalance, as well as supply the absence of programs, of broad spectrum, referring to the scientific impulse at students of high school education. Environmental education is a human being's inherent process through which the individual becomes capable of analyzing the reality of his own environment, identifying problems in it and generating brand new ideas in order to solve the imbalance around. However, this knowledge is currently on incipient development, and because of it it's not being imparted optimally in most of South America. Green Tool focuses on refine and increase innate capabilities of the students through a methodology of innovative teaching for the national standards in environmental education and project management, offering by this way the "tools" that they require to generate their own projects in order to achieve solutions for the variety of environmental troublesomes at stage.

Beneficiary Population:

Directly: Students of 3rd and 4th grade of high school education in the Educative Institutions from the Camana district (934 students).

Indirectly: Population from the Camana District (16,891 habitants).

Detailed Budget:
